

Gabriel Iñigo

Full Stack Developer

WORK EXPERIENCE

Full Stack Developer | Strata Analytics Group (Speaksense AI App)

Apr 2024 - Present

- Engineered an innovative solution with the SST framework that streamlined backend processes, directly contributing to reducing development cycle time from six weeks to just four weeks for future projects.
- Created and deployed 15+ AWS Lambda functions for API endpoints and Cognito triggers.
- Developed a robust API Gateway to manage 10+ endpoints, improving overall system efficiency by reducing response time to under 200 milliseconds.
- Configured cross-account IAM roles for over 10 AWS services, enhancing security protocols and establishing rigorous access controls across resources to protect sensitive data from unauthorized access.
- Designed an efficient authentication framework using AWS Cognito that streamlined login processes for end-users.
- Launch an AWS Web Application Firewall (WAF) to safeguard against common vulnerabilities, creating an ACL (Access Control List) with more than 6 strict rules.

Tools: React · JavaScript · TypeScript · Amazon Web Services (AWS) · Node.js · UmiJs

Frontend Developer | Strata Analytics Group (FlowX App)

Jun 2022 - Apr 2024

- Participated in all phases of web application development from conception to commercialization; achieved transformation of an MVP into a market-ready product while delivering key features.
- Unified interactive UI components with React.js that led to enhancing customer satisfaction ratings based on usability testing feedback collected from more than 10 coworkers.
- Engineered interactive analytics dashboards using the Recharts library, enabling real-time data visualization for 15 key performance indicators.
- Generated a robust unit testing strategy with Jest to validate two key functionalities.
- Created a mock data environment to facilitate frontend development, allowing for simultaneous design and testing of features; reduced overall project timeline by 25% while backend endpoints were under construction.

Tools: React · JavaScript · TypeScript · Amazon Web Services (AWS) · Jest · Node.js · Recharts.js

Frontend Developer | Freelance

March 2021 - Jun 2022

- Executed seamless migration of existing features during transition from Pages Router to App Directory in less than one week while maintaining all functionality intact across core user routes without downtime or errors.
- Lead the frontend project by developing new features and establishing a consistent workflow pattern for a team of three developers.
- Designed comprehensive state management architecture using Redux Toolkit to ensure efficient handling of common actions; reduced manual coding efforts by 30 hours monthly through reusable components.
- Innovated collaborative processes through effective use of Figma's interactive prototypes, enabling rapid visualization adjustments that contributed to resolving five major usability concerns.

Tools: React · TypeScript · Redux · TailwindCSS · Figma

Frontend Developer | One Page Agency

Feb 2019 - Feb 2021

- Developed and customized a portfolio of 25+ WordPress projects, enhancing page load time reduction of over 40% across all managed sites.
- Analyzed SEO performance for over 25 web pages, identified key opportunities to optimize keywords and meta descriptions
- Set up over 100 corporate email accounts with advanced security protocols.
- Migrate more than 25 websites with respective file systems & databases between hostings.

Tools: React · TypeScript · Jest · Node.js · MySQL

ABOUT ME

Developed and implemented software solutions that resulted in a streamlined codebase, enhancing application load times by 50% while tackling complex challenges to reinforce coding skills through practical projects.

INTEREST

Collaborated with a high-performing team to enhance product development practices, ensuring thorough documentation and rigorous testing protocols led to improved project turnaround times by 25% at least during critical phases.

CERTIFICATION

AWS Certified Developer Associate

Sep 2024

AWS Training and Certification

COURSES

JavaScript Algorithms and Data Structures

Mar 2024
